

Risk Minimisation Plan

Dear Parents,

As a registered early childhood education and care service we are required to develop risk management plans for children with medical conditions.

Risk management plans are developed in consultation with families to ensure that the risks relating to your child's specific health care need, allergy or relevant medical condition are assessment minimised.

Attached is a copy of the Weetangera Preschool's Dealing with Medical Conditions in Children procedure and a risk management plan. This risk management plan has been developed for your child's specific medical needs.

Please add any information necessary for your child's health care needs to the forms attached and return them to your child's preschool teacher by 20 February 2019.

Regards

Weetangera Preschool Team
